DETAILED ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1653.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a nucleic acid primer having a first region containing the 5' end of the primer and an immobilization site, and second region containing the 3' end of the primer and a chemically cleavable site and can be extended, classified in class 536, subclass 24.3.
 - II. Claims 22-68, drawn to a kit and method to determine the size of more than one primer extension product, classified in class 435, subclass 91.2.
 - III. Claims 69-87, drawn to a method to determine the presence of a polymorphism, classified in class 435, subclass 91.2.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, Group I is drawn to a primer which can be used for amplification or detection, while

Art Unit: 1653

Group II and III are drawn to a method of sizing a target nucleic acid and determining the presence of a polymorphism which can be involved different primers.

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, Group II is for sizing a target nucleic acid and Group III is for determining the presence of a polymorphism.

4. Because these inventions are distinct for the reasons given above and the search required for each Group is different, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (703) 305-7112. The examiner can normally be reached on Monday-Friday from 8:00 AM-4:30 PM.
